### 图像缩放

• resize函数

语法格式

dst=cv2.resize(src, dsize[, dst[, fx[, fy[, interpolation]]]])

• 语法格式

dst=cv2.resize(src, dsize)

src 原始图像

• 语法格式

dst=cv2.resize(src, dsize)

dsize 缩放大小

• 语法格式

dst=cv2.resize(src, dsize)

dsize 缩放大小

b=cv2.resize(a,(122,122))

• 语法格式

dst=cv2.resize(src, dsize, fx, fy)

fx,fy 缩放大小

• 语法格式

dst=cv2.resize(src, dsize, fx, fy)

fx,fy 缩放大小

b=cv2.resize(a,None,fx=0.5,fy=0.7)

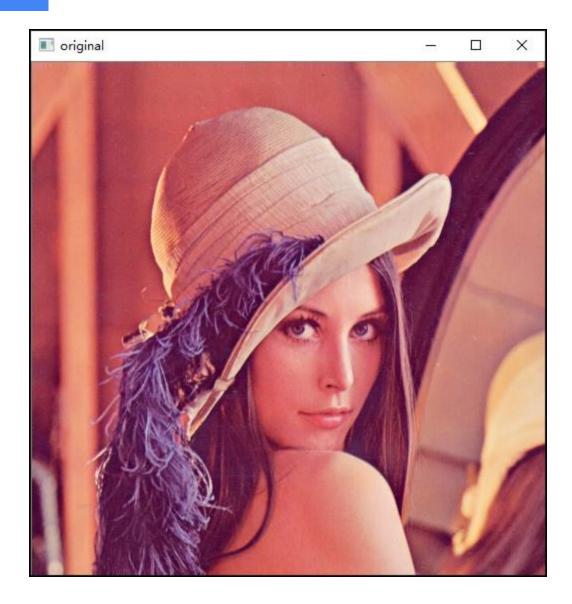

• 语法格式

dst=cv2.resize(src, dsize, fx, fy)

dsize 设置一个即可 fx, fy

```
import cv2
a=cv2.imread("image\\lenacolor.png")
rows,cols=a.shape[:2]
b=cv2.resize(a,(200,100))
cv2.imshow("original",a)
cv2.imshow("resize",b)
cv2.waitKey()
cv2.destroyAllWindows()
```

# resize

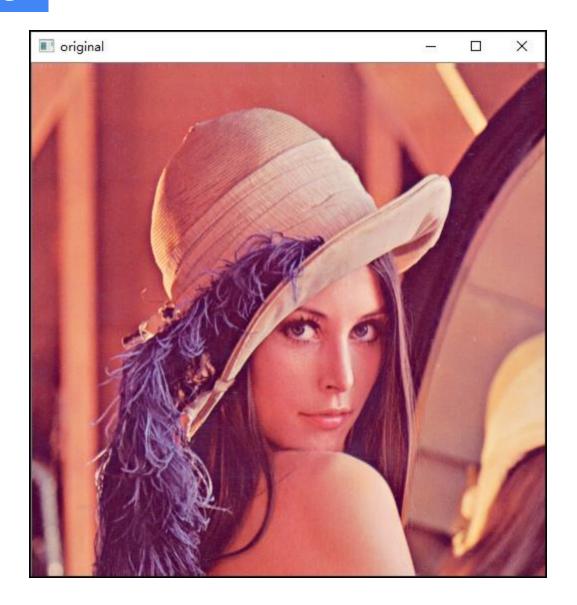

```
import cv2
a=cv2.imread("image\\lenacolor.png")
                                               列,行
rows,cols=a.shape[:2]
b=cv2.resize(a,(200,100))
cv2.imshow("original",a)
cv2.imshow("resize",b)
cv2.waitKey()
cv2.destroyAllWindows()
```

```
import cv2
a=cv2.imread("image\\lenacolor.png")
size=(200,100)
b=cv2.resize(a,size)
cv2.imshow("original",a)
                                          列,行
cv2.imshow("resize",b)
cv2.waitKey()
cv2.destroyAllWindows()
```

```
import cv2
a=cv2.imread("image\\lenacolor.png")
rows,cols=a.shape[:2]
b=cv2.resize(a,(round(cols*0.5),round(rows*1.2)))
cv2.imshow("original",a)
cv2.imshow("resize",b)
cv2.waitKey()
cv2.destroyAllWindows()
```

# resize

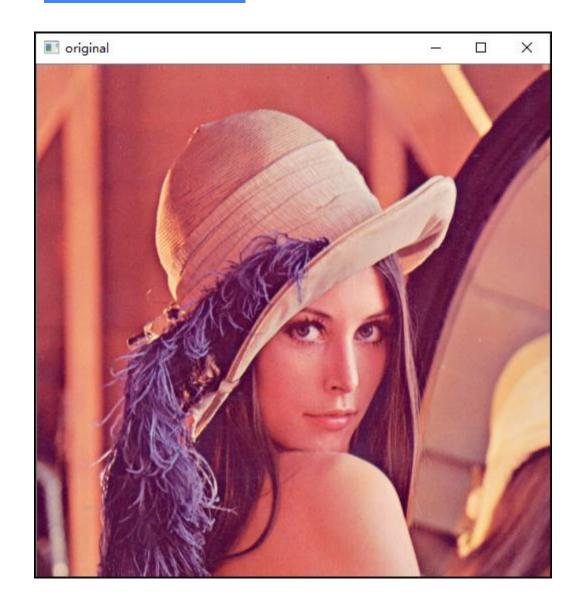

```
import cv2
a=cv2.imread("image\\lenacolor.png")
                                                       列,行
rows,cols=a.shape[:2]
b=cv2.resize(a,(round(cols*0.5),round(rows*1.2)))
cv2.imshow("original",a)
cv2.imshow("resize",b)
cv2.waitKey()
cv2.destroyAllWindows()
```

```
import cv2
a=cv2.imread("image\\lenacolor.png")
                                                        列,行
rows,cols=a.shape[:2]
size=(round(cols*0.5),round(rows*1.2))
b=cv2.resize(a,size)
cv2.imshow("original",a)
cv2.imshow("resize",b)
cv2.waitKey()
cv2.destroyAllWindows()
```

#### 图像缩放-resize函数 (fx,fy)

```
import cv2
import numpy as np
a=cv2.imread("image\\lenacolor.png")
b=cv2.resize(a,None,fx=1.2,fy=0.5)
cv2.imshow("original",a)
cv2.imshow("resize",b)
cv2.waitKey()
cv2.destroyAllWindows()
```

## resize

#### 图像缩放-resize函数 (fx,fy)

import cv2 import numpy as np 行,列 a=cv2.imread("image\\lenacolor.png") b=cv2.resize(a,None,fx=1.2,fy=0.5) cv2.imshow("original",a) cv2.imshow("resize",b) cv2.waitKey() cv2.destroyAllWindows()

### OpenCV+Python图像处理

图像处理利器 ———
